Release 0.1.16

Sorin Muntean

Mar 05, 2017

Contents

1	Installation	3
2	Usage	5

Notary is a Python CLI tool that allows you to manage your project's license. any license from [Choose a License](#) and add it to your project.

CHAPTER 1

Installation

```
pip install notary
```

CHAPTER 2

Usage

```
$ notary
Usage: notary [OPTIONS] COMMAND [ARGS]...

Manages your project's license.

Options:
-h, --help  Show this message and exit.

Commands:
add      Adds a license, replacing any that might exist.
remove   Removes any license present in the current folder.
```

```
$ notary add --help
Usage: notary add [OPTIONS]

Tries to find a license that matches the given LICENSE argument. If one
exists and takes a author and year, it adds them to the license. Otherwise
it writes the license without an author and year and informs the user.

:param license_name: the 'human' name of the license that should be added.
Notary will try to guess the actual name from this. :param author: Tuple
representing the name of the author. :param year: Integer representing the
year that will be written to the license.

Options:
-l, --license TEXT  The name of the license you want to add. Doesn't have to
                    be exact.
-a, --author TEXT   The name that will be on the license. Is ignored if not
                    required.
-y, --year INTEGER  The year that will be on the license. Is ignored if not
                    required. [default: 2017]
-h, --help          Show this message and exit.
```

```
$ notary add
License name: m
The following license file(s) already exist:
/Users/sorin/Workspace/notary/LICENSE
Remove /Users/sorin/Workspace/notary/LICENSE? [y/N]: y
Removed /Users/sorin/Workspace/notary/LICENSE.
Found the following matching licenses:

Added MIT License to /Users/sorin/Workspace/Python/Personal/github.com/notary/LICENSE
```

```
$ notary remove --help
Usage: notary remove [OPTIONS]

Tries to find a file named LICENSE or LICENSE.md. If one (or both) exists,
it asks the user if it should go ahead and remove them. Otherwise it exits
and informs the user that none could be found.

Options:
-h, --help  Show this message and exit.
```

```
$ notary remove
The following license file(s) already exist:
